

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (currently amended) A seal for an optical unit constituting an automobile indicator or illuminating light, intended to be mounted between the optical unit and a support in which it is inserted, the seal comprising:

a sheet of flexible material having a first side, a second side, an outer perimeter, a thickness defined by the distance between the first side and the second side and an internal orifice defining an inner perimeter dimensioned to receive the unit, the first side having a first surface disposed at a top portion of the first side of the sheet of flexible material, and a second surface disposed at a bottom portion of the first side of the sheet of flexible material and a central portion of the first side of the flexible sheet of material disposed between the top portion and the bottom portion each of which extending from the inner perimeter to the outer perimeter of the sheet, wherein the sheet of flexible material comprises a self-adhesive surface skin portion and wherein the top and bottom portions of the sheet of flexible material comprises a material that is more flexible than the material comprising the central portion of the sheet of flexible material; and

at least one lip with a height greater than the thickness of the sheet of flexible material disposed on the first surface of the first side and extending perpendicular thereto, wherein the second surface of the first side comprises no lip.

2. (cancelled)
3. (previously presented) The seal according to claim 1, wherein the sheet of flexible
